PROFILE

CISSP-certified identity and access management leader with 15+ years designing, deploying and securing enterprise IGA and IAM platforms in the utility, healthcare and federal sectors, with deep expertise in SailPoint IdentityIQ, the Oracle identity stack and federated SSO. Now builds production AI systems: LLM-powered identity governance tools at work, and a personal lab of 15+ live web apps, MCP servers and a fleet of scheduled AI agents that build, review and maintain code unattended. Brings a security-first mindset to agentic AI.

EXPERIENCE

Pacific Gas and Electric Company

IT Product Specialist, Expert

San Francisco, CA

JAN 2015 – PRESENT

- ▶ **Built an AI-powered IGA entitlement description generator** that uses large language models to write clear, business-readable descriptions for access entitlements, improving access-review quality and audit readiness.
- ▶ **Designed and deployed an AI-powered IAM chatbot** for enterprise users, giving self-service answers on access requests, entitlements and identity policy and reducing help-desk volume.
- ▶ Installed and configured an end-to-end identity governance and administration (IGA) platform on SailPoint IdentityIQ, and own its full product lifecycle for mission-critical enterprise systems.
- ▶ Manage and optimize 150+ IAM connectors across Active Directory, LDAP, JDBC and web-service targets.
- ▶ Implement security controls and monitoring across data, applications and infrastructure, and maintain regulatory compliance controls for NERC CIP, SOX and HIPAA.

Tech Democracy

IAM Product Specialist

Edison, NJ

JAN 2011 – DEC 2014

- ▶ **U.S. Department of Health and Human Services** (Healthcare.gov, Affordable Care Act program, 2014): delivered integrations across Oracle OAM, OIF, OAAM, OIM and OIA; customized OAAM login flows; configured password policies to IRS security standards; automated role-based provisioning to Active Directory and Exchange.
- ▶ Installed and configured Oracle Identity Manager 11gR2 across development, staging and production.
- ▶ Deployed BI Publisher reporting to detect unauthorized access in key systems, and built generic technology connectors and Active Directory entitlement workflows for application provisioning.

INDEPENDENT AI & AUTOMATION PROJECTS

- ▶ **Autonomous development pipeline** of 60+ scheduled AI coding agents and 80+ workflows that plan, build, review and merge pull requests unattended, with human approval gates before anything irreversible.
- ▶ **Multi-agent collaboration**: an MCP server that lets Claude Code, Codex and Gemini CLI hold structured, turn-based conversations.
- ▶ **Quantitative decision agents**: a prediction-market system with layered risk gates, probability modeling and Kelly sizing.
- ▶ **Operations automation**: a console for scheduled jobs across Task Scheduler and AI agent routines (with its own MCP server), and a containerized cloud pipeline that publishes images, video, podcasts and news digests.
- ▶ **Shipping securely**: 15+ live web apps across Vercel, GitHub Pages, Fly.io, Hetzner and Cloudflare, plus open-source agent skills and automation templates; secrets kept out of source control, row-level security on user data, and a release checklist before anything goes public.

CERTIFICATION

✓ **Certified Information Systems Security Professional (CISSP)** ISC2 · verified on Credly

SKILLS

Identity & Access	SailPoint IdentityIQ	Active Directory	Azure / Entra ID	Oracle OIM / OAM / OIF / OAAM	Oracle Unified Directory	LDAP					
Security	SSO	SAML / OIDC	SCIM	RBAC	MFA	Access governance	NERC CIP	SOX	HIPAA		
AI & Agents	Claude Code	MCP	FastMCP	Gemini	Codex	n8n	LLM integration	Multi-agent systems	Prompt engineering		
Languages	Python	TypeScript	JavaScript	Java	SQL	PowerShell	BeanShell				
Web & Data	React	Next.js	Vite	Tailwind	Node / Express	.NET	PostgreSQL	Supabase	Prisma	SQLite	Firebase
Cloud & DevOps	Vercel	GitHub Pages	Flv.io	Hetzner	Cloudflare	Docker	Git / GitHub	Linux	Windows
